

Final Report for 38392 DOE# ER41406 - "Precision Measurement of Electromagnetic Nuclear Transition Matrix Elements" Gene D. Sprouse, PI

Report

The objective of this grant was to provide support for two graduate students for the 9 month period, 1/1/2006 - 9/30/2006, while they finish up the writing of their theses for research performed under on DOE grant DE-FG02-04ER4.1334 "Gamma-ray spectroscopy at the limits of particle stability". The two students, Tan Ahn and Alin Costin, were supervised by Prof. Norbert Pietralla during his transition to a new position at the Univ. of Cologne, and subsequently to Darmstadt University. The funds were used for this purpose, and both have now successfully completed their Ph.D. thesis and both have been awarded the Ph.D. by Stony Brook.
